

21 November 2023

Managing Director and Founder.

Kindly, Sir

To apply for your company's "Laravel Developer" position, please see my letter. Islamic University, Kushtia, Bangladesh is where I obtained my Bachelor of Science in Computer Science and Engineering, and I have finished all of my coursework. I'm currently searching for work with an IT company similar to yours where I can take on more challenging roles and strive towards greater goals. I have worked as a professional laravel developer for 2 years.

With my hardship, I think I can contribute much to your firm if given the chance to serve.

Regards, really

Md. Rezaul Karim.
